

# ACTIVITY SHEET

## KS2 Weather and Climate

### Draw pictures of the seasons

For each season research the average temperature, rainfall, wind direction, wind speed and sunshine hours. Think about things that happen each season and draw a picture.

Spring	Summer
Autumn	Winter

## Climate change

Climate change refers to a large-scale, long-term shift in the planet's weather patterns and average temperatures.

Climate change is the long-term shift in average weather patterns across the world. Since the mid-1800s, humans have contributed to the release of carbon dioxide and other greenhouse gases into the air. This causes global temperatures to rise, resulting in long-term changes to the climate.

## Create a poster

Create a poster including some of the things that you could do to reduce your impact on climate change.
