

# SAVING EVERY DROP in your home and garden

Use any leftover water at the end of the day to water your houseplants.

Install a water butt in your garden to collect rainwater and use on your plants.

Choose a shower instead of a bath. An average bath uses 80 litres of water.

## Water saving device

Order a replacement shower head today – it uses less water each time you shower without lowering the pressure.

Turning off the tap whilst brushing your teeth can save 6 litres per minute.

## Water saving device

Order an aerator for your household taps to aerate your flow and save water. Don't worry, this will not impact your water pressure.

Use the short flush button on a dual flush toilet to save water each time you flush.

Use a watering can instead of a hosepipe to water your garden.

Using the washing machine when you have a full load can save 20 litres and reduce your energy consumption.

Only fill the kettle with what you need – this will save water and electricity!

Let your lawn go brown in the summer months, it will soon bounce back again when it rains.

A full dishwasher load on an eco setting is more efficient than washing dishes by hand.

It's vital to check your home for leaks regularly - please visit our website to find out more.
